OIXIO Advisory

OIXIO Advisory – Business consulting and digital transformation.

OIXIO provides IT consulting services to businesses, helping them identify and implement IT solutions to achieve their business goals. The company's consultants have a deep understanding of the latest IT trends and technologies.
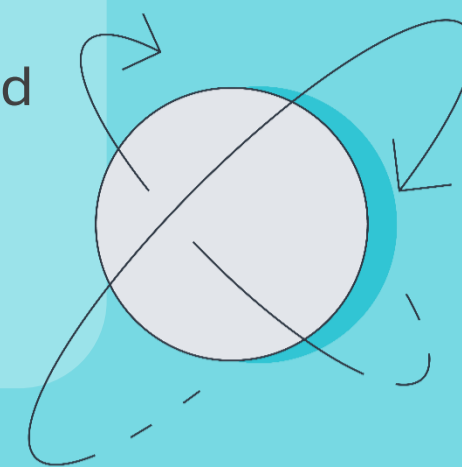

OIXIO IT

OIXIO IT – IT infrastructure services

We provide comprehensive IT infrastructure and support services to businesses, including hardware and software procurement, installation, configuration, and maintenance. The company also offers managed IT services that take care of all aspects of IT management, freeing up businesses to focus on their core operations.

OIXIO Digital

OIXIO Digital – Business solution implementation.

Track and manage software licenses: We can help businesses track and manage their software licenses across their entire IT environment. This can help businesses identify and correct compliance issues, reduce costs, and improve efficiency.

OIXIO Cyber

OIXIO Cyber – Custom and standartized cybersecurity services.

We help businesses protect their data and systems from cyberattacks. The company offers a range of cybersecurity services, including vulnerability assessment and penetration testing, incident response, and compliance audits.
